

Amendment to the Specification:

Please amend the paragraph at Page 7, line 10, as follows:

Referring now to Fig. 1, the putter clubhead **10** is secured to a shaft **12** by means of an integral hosel **12'**. The hosel may also be a separate member attached to clubhead **10**. The clubhead is shown addressing a ball **14**, shown in phantom, on a putting green **16**. The clubhead **10** includes a striking face **18** with a weighted portion **20** formed on the rear side. At the bottom of the weighted portion **20** is a soleplate **21**. The weighted portion **20** extends toward the toe and heel of clubhead **10** but is cut out or relieved in the upper part of the center, as shown at numeral **22**. A short rod or bar **24** is secured to, and cantilevered from, the rear side of the striking face **18** at the center of the cut out part **18**, which is also essentially at the weight center of the clubhead **10**. An elongated cylindrical weight **26** is secured at its exact center to bar **24** leaving the ends of weight **26** cantilevered from the point of attachment of weight **26** to bar **24**.
